Decorative Street Lighting Poles

ADLT NZ has tapped in to the vast experience from Vicpole to offer their product range in New Zealand. Vicpole has an impeccable attention to detail and commitment to quality.

From utility street light poles, architectural subdivision poles and even bespoke solutions for any imagination, we offer a complete one-stop-shop for all of your streetscape light pole requirements.

Our 'A Line' selection includes a finished product with one seamless vertical section, built to meet NZ Specifications, including a coastal paint finish and 50-year structural design life.

Whatever your colour preference, we can match any dulux colour range from the dulux colour chart or the poles can be raw hot-dipped galvanised.

Features

- 50 Year Design Life
- Standards Compliance
- 10 Year Paint Finish Warranty
- Architectural Paint Finish
- ATCOP Approved
- 6.0m, 8.0m, 10.0m and 12.0m Mounting Height Options

Premium Paint Finish

Our suppliers use a finish designed specifically for the coastal New Zealand environment. This premium paint specification has been prepared by Dulux and comes with a comprehensive 10 year paint finish warranty.

After careful steel fabrication, poles are first hot dip galvanised and then lightly sand blasted to create an optimum adhesion surface. A hand finishing process removes any blemishes and zinc build ups ensuring a perfectly smooth finish. The poles are then cleaned and degreased, ready for the painting process.

The poles are sprayed with an epoxy primer providing an additional thick protective coating. After the primer has cured a top-coat of Dulux Acrathane is applied. This is a 2-pack epoxy acrylic that is tough, has excellent abrasion and graffiti resistance properties, is resistant to salt water, solvents, acid/alkaline environments, heat and weather. It can easily be touched up should any damage to the paint work occur.

Unlike many common paint and powder coating systems that suffer from chalking and fading, the unique paint system ensures the finished product will retain its gloss and colour. The paint finish is covered by a comprehensive warranty, through Dulux, for 10 years.
